Kind Regards

It is with great confidence that we provide this reference for JBA Security, who has managed the security operations at our Food Lover's Market Distribution Centers for the past 15 years. They currently oversee 70 guards across our various sites in Gauteng and the Western Cape.

Operating a high-volume DC requires a security partner that understands the complexities of logistics, 24-hour operations, and loss prevention. JBA Security has consistently risen to the challenge. Their team is exceptionally disciplined, punctual, and maintains the strict professional standards necessary for our specialized environment.

What differentiates JBA is their adaptability. Whether they are managing the constant flow of delivery vehicles or overseeing the safety of our large warehouse teams, they handle every situation with efficiency and a calm, authoritative presence. Their management team is available around the clock, providing us with the peace of mind that our facility and stock are always protected.

Furthermore, we are consistently impressed by the respect they show their guards. This culture of appreciation is clearly reflected in the guards' performance on-site; they are motivated, vigilant, and take genuine pride in their work. This level of employee care is rare and provides a significant benefit to our overall operation.

We highly recommend JBA Security to any organization looking for a dependable, high-quality security partner capable of managing complex industrial environments.
